4-H Junior Master Naturalist Program
Resources for Outdoor Schools

The Oregon 4-H Junior Master Naturalist Program invites you to share your love of the out-of-doors with your students! This new Oregon 4-H program is designed to provide teachers and students an engaging introduction to Oregon’s diverse ecoregions, ecosystems, and natural resources. Using the resources gathered in this program schools will easily provide students with the program characteristics and outcomes they need to meet the reporting requirements of the OSU Extension Service Outdoor School funding.

The program is divided into six units, each containing four or five lessons. All the lessons are provided on-line and can be downloaded at no cost. Some lessons are best done in the classroom, others in the field. Data collection sheets are provided for each unit’s field experience. There are even cool interactive tutorials featuring Ranger Jenny (right)!

Check it out at our website http://oregon.4h.oregonstate.edu/projects/nat-sci/junior-master-naturalist

Unit 1) The Place we call Home- An Introduction to Ecoregions
Unit 2) Geology and soils
Unit 3) Watersheds & Water Resources
Unit 4) Forests
